

DELMIA ORTEMS MANUFACTURING PLANNER

STRATEGIC AND TACTICAL PLANNING

**MANAGE LONG
CYCLE TIMES
AND COMPLEX
PRODUCTION
RUNS**

DELMIA® Ortems Manufacturing Planner improves Sales & Operations Planning (S&OP) and Master Production Schedule (MPS) processes for manufacturers.

Part of the DELMIA portfolio, Manufacturing Planner integrates processes and identifies all resource and production related constraints for companies that manage complex production runs or long cycle times.

BENEFITS

- Meet customer due dates and improve customer service
- Anticipate and control load fluctuations
- Synchronize production with other factories
- Reduce inventory and cycle time
- Re-synchronize flow lines in case of contingencies
- Reduce planning time
- Easily integrate into other Enterprise Resource Planning (ERP) systems

Quickly identify manufacturing bottlenecks

Manufacturing Planner offers load analysis views to quickly identify manufacturing bottlenecks across all primary and secondary resources. The configurable load-leveling engine detects capacity overloads as they occur. Decisions can be made about capacity adjustments, capital expenditures, and load balancing across internal and external resources.

Schedule modifications and what-if simulations

Rich, interactive tools are provided for schedule modifications and what-if simulations. This allows you to quickly respond to production contingencies, capacity issues, and changes in customer demand.

Essential collaboration tools

Collaborative features enable supply chain participants to stay engaged based on their level of responsibility. You can share planning and Key Performance Indicator (KPI) data with the entire organization, as well as partners, customers, subcontractors, and suppliers. This innovative and user-friendly design is an essential tool to help teams anticipate and control load fluctuations.

Innovative and user-friendly design is an essential tool to help teams anticipate and control load fluctuations.

Quickly identify manufacturing bottlenecks across all primary and secondary resources.

Our 3DEXPERIENCE® platform powers our brand applications, serving 12 industries, and provides a rich portfolio of industry solution experiences.

Dassault Systèmes, the 3DEXPERIENCE® Company, provides business and people with virtual universes to imagine sustainable innovations. Its world-leading solutions transform the way products are designed, produced, and supported. Dassault Systèmes' collaborative solutions foster social innovation, expanding possibilities for the virtual world to improve the real world. The group brings value to over 210,000 customers of all sizes in all industries in more than 140 countries. For more information, visit www.3ds.com.
